

## Press Release

# VTG publishes its first Sustainability Report

- **Company is expressly committed to the Paris Agreement as well as the UN's Sustainable Development Goals (SDGs)**
- **VTG willingly assumes ecological, economic and social responsibility and has set goal of being climate-neutral by 2040**

**Hamburg, May 4, 2022.** VTG Aktiengesellschaft has published its first sustainability report this week. In it, the company sets out its medium- and long-term vision, specifies concrete goals in three overarching areas of action, and presents first successes of its commitment. In future, VTG will report annually on the company's sustainability performance.

The fight against climate change is one of the most pressing challenges of our day. Yet to maintain social cohesion, it is also crucial to strike a healthy balance between growth, prosperity and equity. "By combining responsible action with innovative solutions and the careful conservation of resources, we at VTG are committed to playing our part in sustainably improving the quality of life. We are convinced that protecting fundamental natural resources, shouldering social responsibility and delivering solid economic performance are aspects that must go hand in hand," says Oksana Janssen, Chief Operating Officer Eurasia & Far East at VTG AG.

When it comes to implementing forward-looking and climate-friendly mobility concepts, rail freight is of pivotal importance. VTG is driving the implementation of sustainable and climate-friendly mobility concepts and is committed to shifting traffic in favor of rail. "We are reimagining rail freight transport around an array of innovative and integrated services. Our aim is to persuade customers of the strengths of this system and, in so doing, to actively advance the transport transition," says Sven Wellbrock, Chief Operating Officer Europe & Chief Safety Officer at VTG AG. "We are keenly aware of the need for VTG – the market leader and a driver of innovation – to set an example by putting our expertise and inventive capabilities to good use."

VTG is expressly committed to the Paris Agreement as well as the UN's Sustainable Development Goals (SDGs) and willingly assumes ecological, economic and social responsibility. To this end, the company has aligned itself with the seventeen sustainability goals of the United Nations and focuses on those SDGs on which one can have the greatest influence and effect:

- VTG is committed to equality, inclusion and anti-discrimination.
- VTG ensures a safe working environment for its employees through the highest standards of occupational health and safety.
- VTG is committed, among other things, to the careful use of resources – in the construction, operation and maintenance of its mobile infrastructure.

- VTG supports projects in the field of children's and youth education and the promotion of sports.

The company has a profound sense of responsibility toward mitigating climate change – not only because of our core business, but because we have also set ourselves the goal of being climate-neutral by 2040.

In addition to the analyses carried out internally and the development of VTG's sustainability strategy, VTG also took part in the sustainability ranking of the American-Dutch GRESB Institute in the reporting year 2021. Of around 550 participating companies worldwide in the infrastructure sector, VTG landed in 22nd place with 96 out of 100 achievable points. "With a GRESB ranking that places us among the top 4 percent of sustainable investments, we are underscoring VTG's attractiveness to our financing partners, as we are also leading the way in the environmental, social and governance space," adds Mark Stevenson, Chief Financial Officer der VTG AG.

Like all major transitions, however, change begins with the little things: with every process, every product, every service – and every one of us. This is the commitment the company wants to carry over into the marketplace – a commitment that will be made clear at the first 'green event' on *150 years of private-sector wagon leasing* in Vienna in May.

#### **About VTG:**

Headquartered in Hamburg, VTG Aktiengesellschaft is a global asset owner and logistics company with a strong focus on rail. Besides hiring out rail freight wagons and tank containers, it also provides multimodal logistical services and integrated digital solutions. The company's fleet includes around 88,500 rail freight wagons – mostly tank wagons, intermodal wagons, standard freight wagons and sliding-wall wagons – as well as about 5,000 tank containers.

This diversified service portfolio gives VTG's customers a robust platform for international freight transportation, based on which the company develops made-to-measure logistical solutions for any and every industry. Over many years, VTG has accumulated granular expertise across the entire transport chain – expertise that is now flanked by smart technology. The Group likewise combines a wealth of experience with a specialized knowledge of the transportation of liquid and sensitive goods in particular. Its customers include a plethora of leading companies representing the chemicals, petroleum, automotive and paper industries, agriculture and virtually every other sector besides.

VTG posted revenue of EUR 1,221 million and an operating profit (EBITDA) of EUR 472 million in the 2021 financial year. The Hamburg-based company's subsidiaries and affiliates give it a sizable footprint in Europe, North America, Russia and Asia. Effective December 31, 2021, VTG employed around 2,150 people worldwide.
